AB The building material compns. comprise powdery Ca(OH)₂ 100, white cement 80-90, fired white diatomaceous earth powder 50-60, powdery clayey material 11-67, acrylic resin 6-7, metolose 4-6 and antifoaming agent 1-2 wt. parts. The powdery clayey material is sepiolite, bentonite, or zeolite. The building material compns. are coated by various means onto boards, panels or walls.

ST building board coating material calcium hydroxide; white cement building board coating material; diatomite building board coating material; sepiolite building board coating material; bentonite building board coating material; zeolite building board coating material

IT Construction materials
(boards; coating materials having dew condensation-preventing effect for)

IT Loess
(building board coating materials having dew condensation-preventing effect contg.)

IT Acrylic polymers, uses
Bentonite, uses
Diatomite
Zeolites (synthetic), uses
